What it is?

Come join us at Memorial Speech and Occupational Therapy for a fun-filled week of social skills camp!

Through exciting activities we focus on social engagement and communication with peers, problem solving, sportsmanship, playing, sharing and turn taking to foster relationships and gain confidence in social situations. The five areas of focus each week will be on sensory skills, gross and fine motor skills, language and social and emotional development. The tools we use to facilitate these skills are led by both Occupational and Speech pathologists with over 25+ years of practice who will be using Social Thinking curriculum and Zones of Regulation.

What it is?

We offer a comprehensive, multi-sensory handwriting lesson plan designed to incorporate all the critical skills necessary for successful handwriting development. Our program engages students through interactive and dynamic activities that stimulate visual, auditory, and tactile learning pathways, ensuring a well-rounded approach to mastering handwriting.
